

Toe Htet Arkar (Delbin)

AI-Centric Product Designer

delbinhtet@gmail.com | +66 098 025 8752 | Bangkok, Thailand | English - Burmese (bilingual)

Open to full-time, part-time, contract (3-6 months), and freelance | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

AI-centric product designer with 4+ years of experience designing the interfaces where people build, validate, and trust machine learning systems. Owns work end-to-end - field research and user flows through high-fidelity UI, design systems, and developer handoff - with recent work concentrated on AI products: a Vision AI operations platform, a synthetic-data platform for training vision models, and the computer vision tooling around them. Works close to the model, not just the interface: annotated a 1,186-image dataset and trained a YOLOv11 detector to 77.4% mAP@50, built a six-stage human-in-the-loop training harness on the Claude Agent SDK, and validated a synthetic-data pipeline by training on its output in Roboflow. That fluency shows up in the design decisions - making a model's verdict legible enough for a domain expert to act on, and making validation a gate rather than a suggestion. Also ships enterprise work at scale - defence training operations for MINDEF Singapore, plus healthcare, edtech, and fintech - and designs accessibility as a constraint rather than an add-on, particularly for users who are older, under time pressure, or new to digital systems. Bilingual (English / Burmese), based in Bangkok, with remote experience across Singaporean, Thai, Myanmar, and US teams.

WORK EXPERIENCE

Sigmawave AI - Product Owner / Designer (Full-time)

Singapore (Remote) - Feb 2024 - Present

- Promoted from designer to Product Owner / Designer, taking on product direction alongside design across the company's platforms.
- Led end-to-end design of IMT TRMS, a training resource management system for MINDEF Singapore, over roughly 1.5 years - field research at SAF training camps through role-based user flows, information architecture, and high-fidelity UI for four distinct user roles.
- Redesigned both Terra (synthetic data platform) and Accel (Vision AI operations platform) from scratch, owning research, flows, and every screen.
- Built and delivered the design system used across all company products.
- Shipped across four domains in one company - defence, education, computer vision tooling, and physical security.
- Collaborated closely with stakeholders and PMs to define requirements, align priorities, and ensure design solutions matched real operational needs.
- Produced wireframes, high-fidelity screens, and interactive prototypes to communicate system-wide journeys and key interactions, improving design validation and developer alignment.
- Managed the internal development team, led sprint planning and Scrum delivery, and managed and prioritised the product backlog (epics, stories, tasks) with roadmaps and Gantt charts.
- Picked up computer vision on the job and began contributing to CV-related product tasks.

Singtechnologies - Product Designer (Contract)

Singapore (Remote) - Jan 2024 - Jan 2026

- Owned end-to-end UI/UX for the Pistil women's healthcare platform - user, admin, and doctor dashboards plus the mobile app.
- Designed core product modules including Pistil Clinic and Pistil Pharmacy, translating requirements into complete flows, screen-by-screen UI, and interaction states.
- Built both client-facing and doctor-facing web experiences, mapping permissions and role-based actions so each user type sees the right information and tools.
- Started every feature in low-fidelity wireframes before moving to high-fidelity, and used prototypes to carry developer handoffs - fewer misreadings, fewer surprises.
- Produced UX deliverables (user flows, IA, wireframes) and UI outputs (high-fidelity screens, components, prototypes) to communicate designs clearly to stakeholders and developers.

- Worked closely with stakeholders to gather requirements, challenge unclear assumptions, and refine scope.

404 Collective Agency - Product Designer (Part-time)

Singapore (Remote) - Mar 2024 - Apr 2025

- Designed two products from the ground up: Global Caring, a nursing platform supporting healthcare professionals, and Sofinise, a crypto payment gateway.
- Worked directly with developers and stakeholders on both projects.

REDES Design Agency - Product Designer (Part-time, Co-Founder)

Bangkok (Remote) - Sep 2023 - Mar 2024

- Co-founded the agency and worked alongside senior UX designers to deliver user-centric design solutions for clients.
- Main project was Jar Aye, an Olympiad math platform for young learners, where I owned the student experience through research, wireframes, prototyping, testing, and handoff.

LastoEnjoy - UI/UX Designer (Full-time)

Mandalay (Remote) - Jul 2023 - Dec 2023

- First full-time design role. Designed mobile apps and websites for client projects - mostly consumer products including blogging apps, ride-hailing, and other mini-apps.
- Gathered requirements, translated needs into user flows and high-fidelity UI, and supported delivery through clear handoffs and iteration, shipping at roughly a product a month.

SELECTED PROJECTS

Accel - Vision AI Operations Platform - Sigmawave AI

May 2026 - Jul 2026 - Product Designer / Owner

Designed a full-stack, on-premise Vision AI operations platform end-to-end: model and rule creation, a validation pipeline with VLM reasoning, deployment to cameras, live monitoring, and incident reporting - 17 feature modules across 5 platform sections, designed against a three-role permission matrix. Made validation the gate for deployment by design, so only a model proven against real footage reaches a live camera.

Terra - Synthetic Data Platform - Sigmawave AI

Apr 2025 - Jun 2026 - Product Owner + Designer

Redesigned a working synthetic-data platform used to train AI vision models. Benchmarked four competitor platforms, took a month of Blender and Unreal Engine training to understand the 3D work users actually do, gathered feedback from existing users, and rebuilt the product around a canvas-first 3D builder - 35+ feature modules, with datasets exported auto-annotated in COCO, YOLO, and Pascal VOC. Validated the output by taking Terra-generated images straight into Roboflow and training a model on them.

IMT TRMS - Training Resource Management System - SAF (via Blue Silo)

Mar 2024 - Apr 2025 - Lead Product Designer

Secure, modular training-operations platform spanning two training systems (IMT and SWT) and coordinating with the Instructor Operating Station, Army Training Management System, and RFID asset tracking. Ran field research at multiple SAF training camps, then designed separate user flows and IA for four roles - prioritising high contrast, large touch targets, and minimal steps for older users working under time pressure.

DETECT - Accident Detection System - RIC Applied AI Innovation Challenge 2026

Mar 2026 - Team Lead, CV Model Developer, Product Lead & Pitcher

Three-person, two-week build combining a custom accident-detection model with an operator dashboard and multilingual witness SMS reports. Personally annotated 1,186 real accident images across four classes and trained a YOLOv11 model to 77.4% mAP@50 (76.6% precision, 75.6% recall, 177 epochs). Led the team, integrated detections into the dashboard, and pitched the result live. Second Runner-Up.

GreenSkill RSU - Peer-Learning Platform - Rangsit University

2026 - Project Lead, UI/UX Designer & Developer

Peer-learning platform built by an eight-person student team. Surveyed 29 students to establish the need (89.6% had needed peer help; 79.3% struggled to find the right person), designed the post -> match -> chat -> book -> recognise loop, built the responsive web prototype, and deployed it on Vercel. Selected Top 5 of 96 university projects and placed Second

Runner-Up.

CV Training Pipeline - Human-in-the-Loop Agent Harness

2025 - AI Developer + Pipeline Architect

Personal project. Built a six-stage computer-vision training pipeline on the Claude Agent SDK - 17 MCP tools, three training backends (Roboflow cloud, local Apple MPS, and free Kaggle GPU), and a human approval gate on every irreversible action. Proved it end-to-end on a gaze-direction detector for wheelchair-assisted paralysis patients: mAP@50 0.995, precision 0.993, recall 0.990.

COMMUNITY & VOLUNTEER EXPERIENCE

UXMM - Multimedia Specialist

Myanmar (Remote) - Dec 2025 - Present

- Create, edit, and publish video and podcast content for UXMM events, optimised for YouTube and Instagram (format, resolution, captions, platform-ready cuts).
- Manage the organisation's media library and maintain consistent brand identity across media.
- Collaborate with the Content and Visual teams to support seamless storytelling.

Tee Htwin - UX Designer

California (Remote) - Dec 2022 - Mar 2024

- Led the design team in crafting Kanote, a digital art marketplace for Myanmar artists, rooted in Design Thinking.
- Interviewed 50+ artists and art lovers one-on-one through social media, community networks, gallery visits, and in-person meetups, then verified the patterns with a structured survey across Myanmar.
- Ran usability testing with 15+ participants and used the findings to cut features and simplify the platform rather than add to it.
- Applied feature prioritization to ship a focused MVP; 90% of young Myanmar artists surveyed expressed interest and willingness to use the product.
- Built the pitch deck and presented at Techstars Startup Weekend Yangon 2023, where the team ranked Top 7 among national startups.

The Forward Society - UI/UX Designer (Part-time)

Myanmar (Remote) - Jan 2023 - Dec 2023

- Built a blog website for the organisation from scratch, learning layout fundamentals and design tooling under a senior web design instructor.

Pathway Plus - UI/UX Designer

Myanmar (Remote) - Feb 2023 - May 2023

- Worked with other UI designers on interface designs, comparing how different designers approach the same problem.

EDUCATION

Bachelor of Science (Digital Innovation Technology) - Rangsit International College

Jan 2026 - Present

Bachelor of Engineering (Civil Engineering) - Sagaing Technological University

Dec 2018 - Apr 2020

AWARDS & COMPETITIONS

Second Runner-Up - RSU GenED Online Show & Share 2569 - Rangsit University - Jul 2026 - Led an eight-person team (GreenSkill RSU); Top 5 finalist of 96 projects and the only International College finalist

Second Runner-Up - RIC Applied AI Innovation Challenge (AIIC 2026) - Rangsit University - Mar 2026 - DETECT accident-detection system

Falling Walls Lab 2023 - Aug 2023 - Three-day programme on pitching research-backed ideas; presented "Breaking the Wall of Art Community Barriers", an early version of Kanote

Top 7 nationally - Techstars Startup Weekend Yangon 2023 - Mar 2023 - Kanote art platform

CERTIFICATIONS

- AI Fluency: Framework & Foundations - Anthropic - 2026

- Model Context Protocol: Introduction & Advanced Topics - Anthropic - 2026
- Claude 101 - Anthropic - 2026
- Introduction to Agile Development and Scrum - IBM - 2026
- The Product Owner Profession: Unleashing the Power of Scrum - Coursera - 2025
- In-Depth CapCut Video Editing Masterclass: Advanced Tools - Coursera - 2025
- Design System Hands-on Training - Productive Schedule - 2024
- Enterprise Design Thinking Co-Creator Course - IBM - 2023
- Iterate UX Design Challenge Certificate - Iterate - 2022
- Iterate UX Research Challenge Certificate - Iterate - 2022
- Google UX Design Certificate - Google - 2022
- SUM UI/UX Design Fundamentals - Spring University Myanmar - 2022

SKILLS

Product Design - UI/UX Design - Design Systems - Interaction Design - User Flows - Information Architecture - Human-Centered Design - Design Thinking - Accessibility (WCAG) - User Research - Usability Testing - Journey Mapping - Rapid Prototyping - Data-Driven Design - Conversion Optimization - Product Ownership - Scrum & Sprint Planning - Backlog Prioritisation - Stakeholder Alignment - Developer Handoff - AI Fluency - Computer Vision (dataset annotation, model training & evaluation) - Agent & MCP Tooling - Front-end Prototyping

TOOLS

Figma - Adobe CC (XD, Illustrator, Photoshop, Premiere Pro) - Maze - Miro - Jira - Webflow - Framer - SurveyMonkey - Blender - Unreal Engine - Claude - Claude Agent SDK - Roboflow - Ultralytics (YOLOv8 / YOLOv11) - Kaggle - React - Express - MongoDB - Vercel - CapCut
